

AQUA HARNESS

Designed to offer postural support for those with special needs who need to be held in an upright sitting position and thus aid the carer with the bathing of the patient.

Available in two sizes: Children up to approximately 8 years & Adult size.

The standard harness consists of waistbelt, inner chair attachment strap & adjustable shoulder straps.

This harness is fitted with the 'Duraflex Side Squeeze buckle' as standard.

Optional Extra

An understrap / groin strap can be fitted for those patients who tend to slip downwards in the seat.

Cat. Ref: AQUA/U

Application

Firstly unfasten the front central waistbelt buckle and the inner chair attachment strap.

The inner chair strap is attached around the seat back and tightened to fit securely.

The 'looped end' of each shoulder strap loops either side of the waistbelt 'side-squeeze' buckle.

Fasten the waistbelt and adjust all straps to fit tightly yet comfortably.
