

The finished Harbour Docking Harness ready to use.

1. Line up the backpad.

2. Place bar buckles over back of seat.

3. Feed the fixing straps through the gap in the seat.

4. Pull the fixing strap through from back of seat.

5. Feed the loose end through the bar buckle from the back.

6. Lift the Black bar and feed loose end down through the slot.

7. Pull the loose end to tighten the strap.

8. To secure, feed the loose end into the top slot of the slide.

9. Finish by feeding the loose end through the bottom slot of the slide.

10. Repeat process for the other strap.

11. Ensure backpad is in correct position for your specific use.

Now the Harbour harness is properly fitted and ready to dock with the Guardian harness, once fitted ask and ensure that the occupant is comfortable.
